Introduction

Give your brand the web presence it deserves with the number #1 Odoo theme in the market: Theme Scita. One of the most elegant themes which are developed keeping all industries in mind. We've designed this theme considering e-commerce, healthcare, fashion, finance, and many more industries. It is perfect for every business. Designing your website has never been this easy with our theme Scita.

Benefits of Odoo Theme Scita

- Helps in ranking your business higher with faster page loading speed.
- Theme Scita includes a powerful mega menu, select snippets, elegant header footer options, and more.
- It is well-coded, organized, and modular to help you get the aspired look for your website.

Pre-requisites

- Following points must be followed before starting the plug-in installation:
- You should log in as an Admin in Odoo.
- Check that your Odoo Instance is compatible with Scita Theme.
- An e-commerce module should be present in your instance to use this theme.

Installation

Installation Steps

- Download the latest Odoo version. Go to the website record and install Theme Scita from there.
- Download **Theme Scita** from the 'Odoo store'. Once downloaded, you will get a folder with the name 'theme_scita'.

- You need to add this folder in your addons directory and restart the Odoo server instance and update your App List. Now go to **WEBSITE -> Edit -> Theme**.
- In website settings, select a website in which you want 'Theme Scita' to be installed.
- Click on the '**Switch a Theme**' button. On clicking, you will get redirected to a list of themes available.
- Click on **Theme Scita** to install it on your website.
- After selection, click on the **Save** button to save the changes.
- After installation, you can see theme details under the 'Website' section.

Theme Configuration

Customize Theme

- After Installing the theme, go to **Website** and click on ‘✎ Edit’ which is on the right side of the page.

- After clicking on ‘✎ Edit’, it will open pop up box with different 3 **tabs** to set/change the themestyles:
 - Blocks
 - Style
 - Theme
- From the available options, set the option which suits best for the website.

Blocks

- You will get the snippet list of the “Theme Scita” drop-down option under the “Blocks” tab.

Style

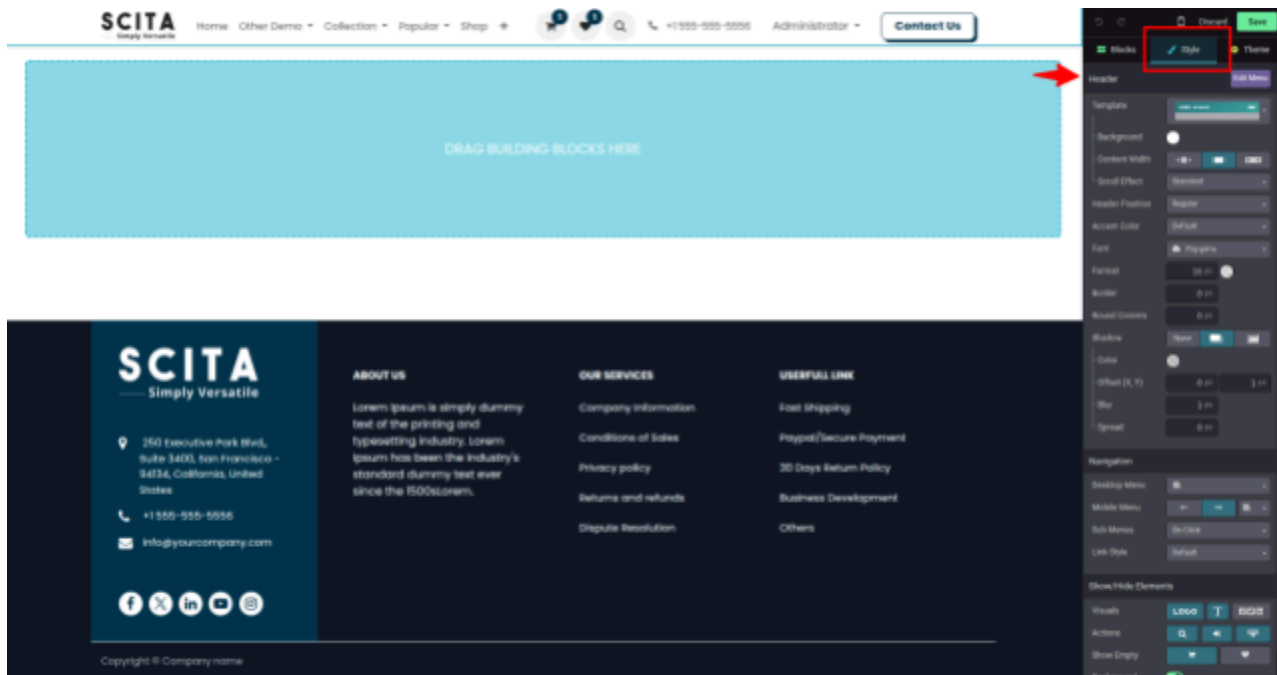

- You can customize the website ‘Header’ & ‘Footer’ under the “Customize” tab.

Theme

- You can customize the ‘Theme color’ and its options like ‘templates’, ‘fonts’, ‘buttons’, etc. under the “Theme” tab.

Header/Footer Configurations

- You can customize and configure the header section by 'double-clicking' on it. Once you click on the header section, the **Customize** tab will be enabled from where you can configure and customize the options of the header section.

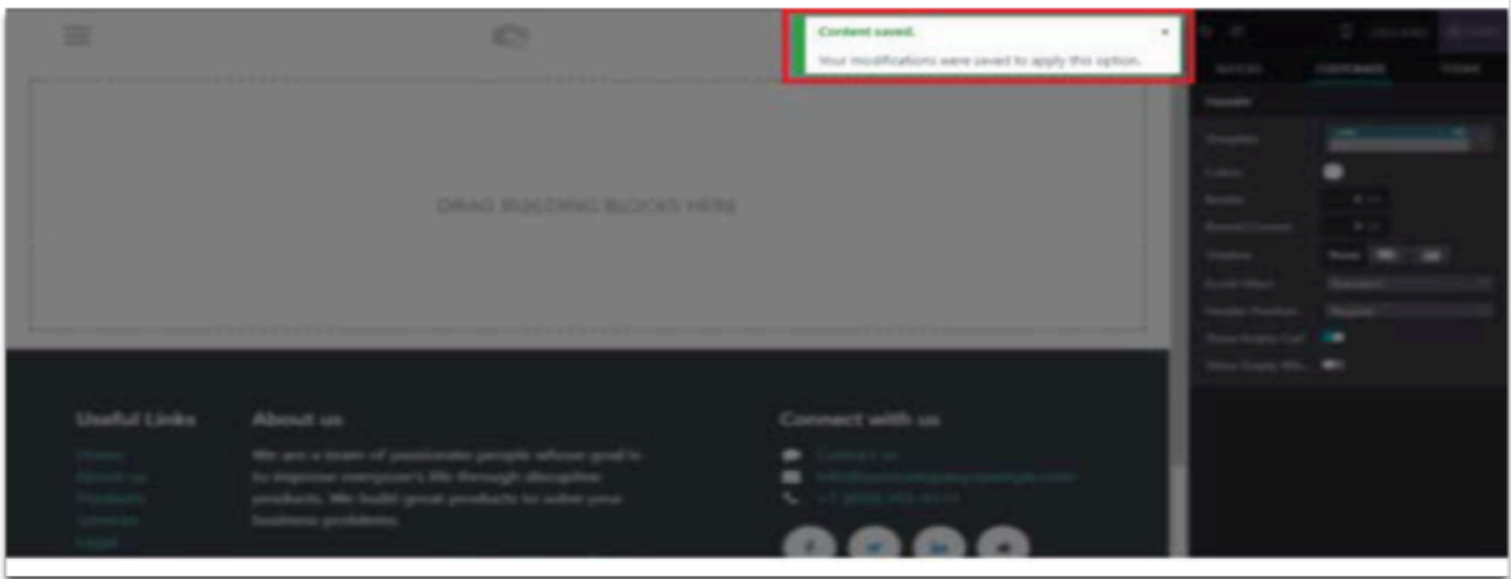

Header Customize Configuration

- Under the "Customize" tab, you can select the Theme Scita template for the Header.
- Clicking on the Template option, it will show different header styles to choose from.
- Mainly there are different header templates available in the theme Scita.
- Select the template that works best for your website structure.
- You can customize the header as per their requirement.
- After selecting any option, you will get the 'preview' as per the selection. By clicking on Save (top-right corner), the website changes will be done.

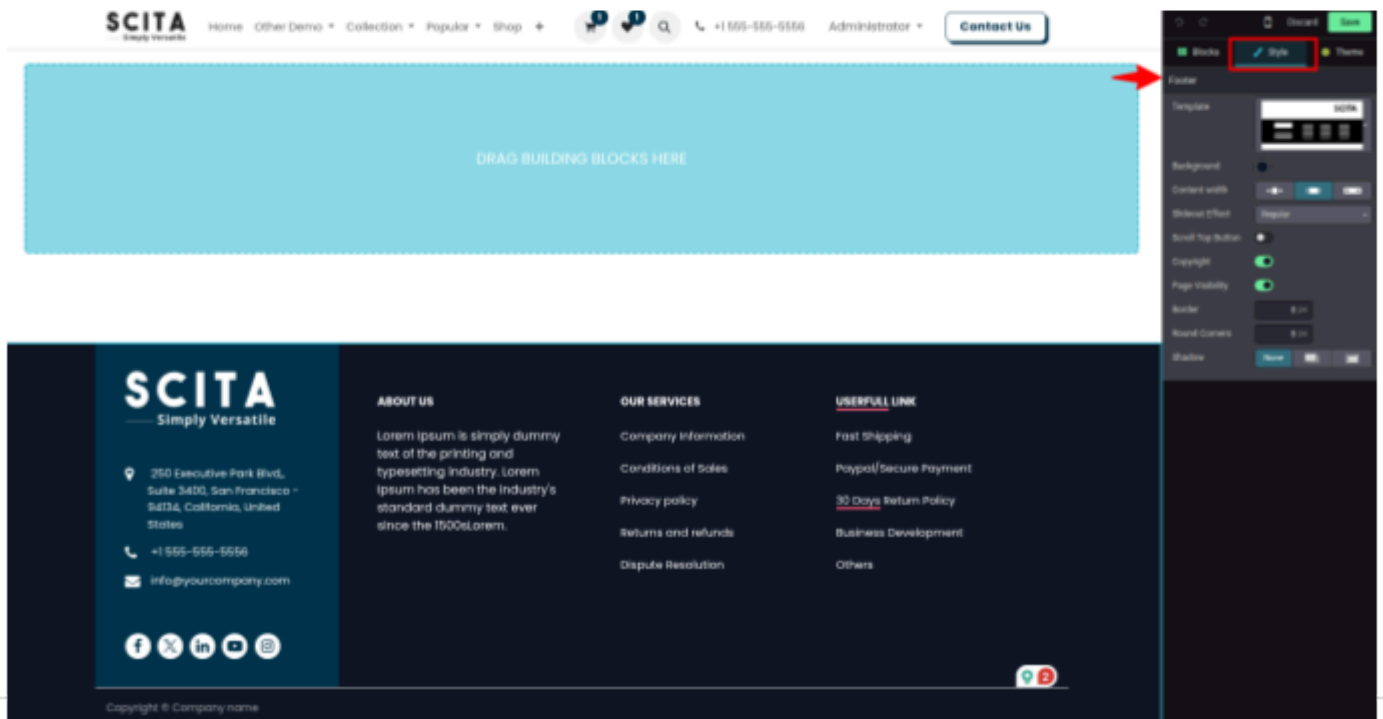

- When you select any ‘template’, you will get the confirmation message to load the webpage.

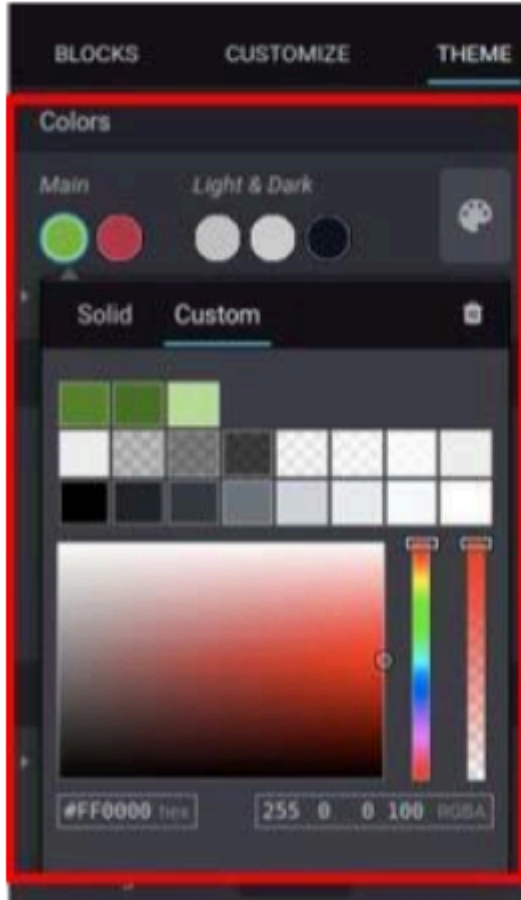

Footer Customize Configuration

- You can configure the footer by selecting the **Footer template** of “Theme Scita”. You can customize the Footer options as per your website appearance. Once you select any template, it will ask for a confirmation message to reload the page as per the changes you made.

Theme & Page Layout customization

- You can customize the Theme options and Page layout of your industry-specific website (store).

Theme Colors

- Under 'Theme Colors', you can choose any color for your website appearance. By clicking on the 'colors' icon, it will show a color picker and in that color picker you can see the two tabs solid and custom which are seen in the below screenshot. We can apply primary as well as secondary color for the theme itself.
- Once you choose any color, it will ask for a confirmation message to reload the webpage as per the changes and save the changes.

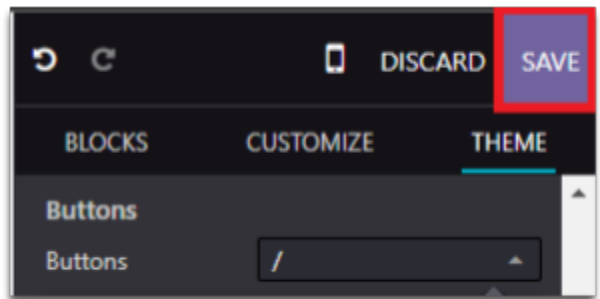

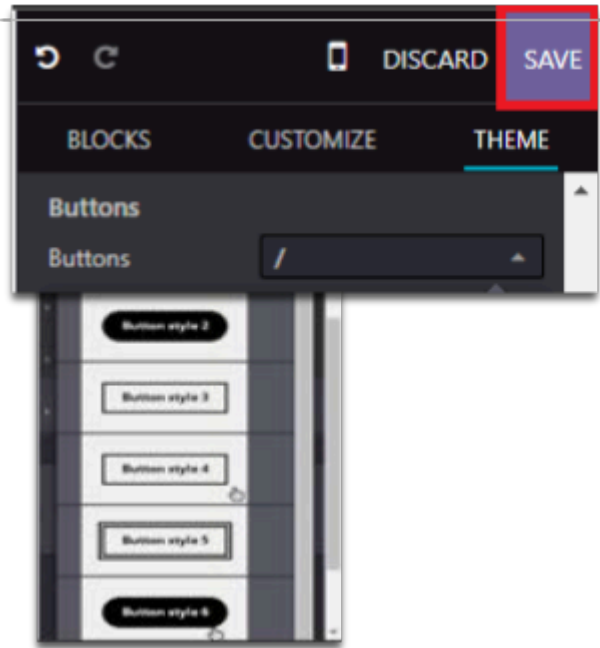

Theme Options

Page Layout

can select the **Background Image or Pattern** for your

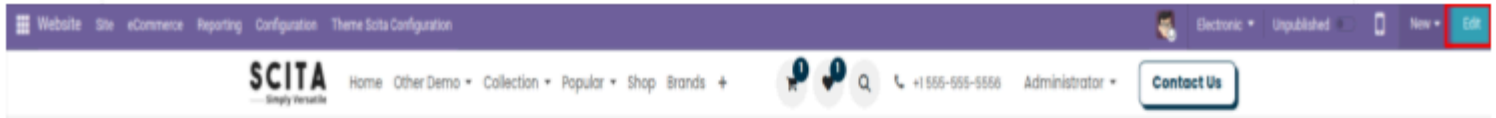

Theme Options ▢ Buttons

- Click on the Buttons drop-down option, it will show different button styles to select from.
 - Mainly there are 8 different button styles available. Select the style that suits best for the website.
 - By selecting any button style, you will get the confirmation message to reload the webpage for preview.
-
- You can set the Odoo default options like padding inputs & Website Settings.
 - Once you customize the Header/Footer, Page Layout, and Theme options, click on the “Save” button to save the modifications.
 - Now, you can add the “Snippets” of the **Theme Scita** to design the industry-specific website (Store).

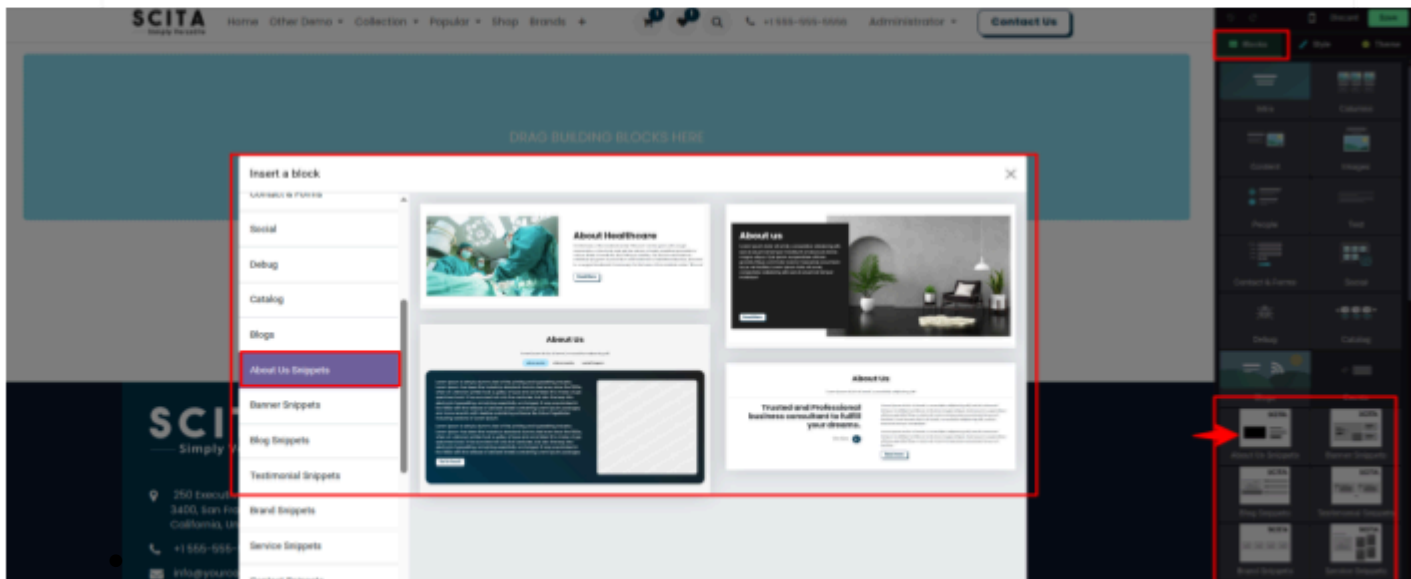

How to add Snippets?

- Now, after theme customization, add the **Snippets** according to the website structure.
- To add Snippets, go to the **Website** and click on the **Edit** button that is available in the top right corner.

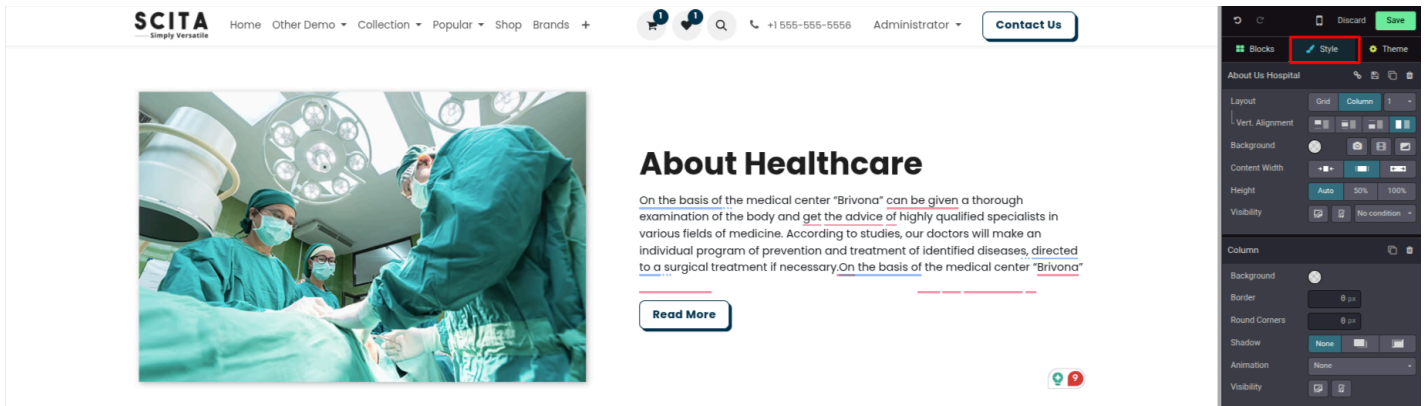

- Clicking on the **Edit** button, a window on the left side with the name “Theme Scita” will appear.

- Click on the “Edit” button. After clicking, a panel will open on the right side showing the available snippet blocks. From this panel, select the snippet category you want (e.g., “About Us Snippets”), and then choose the specific snippet from the options displayed in the center popup.

- You can edit the content of the Snippet. When you select the snippet, the snippet-related options will be enabled under the “Customize” tab.

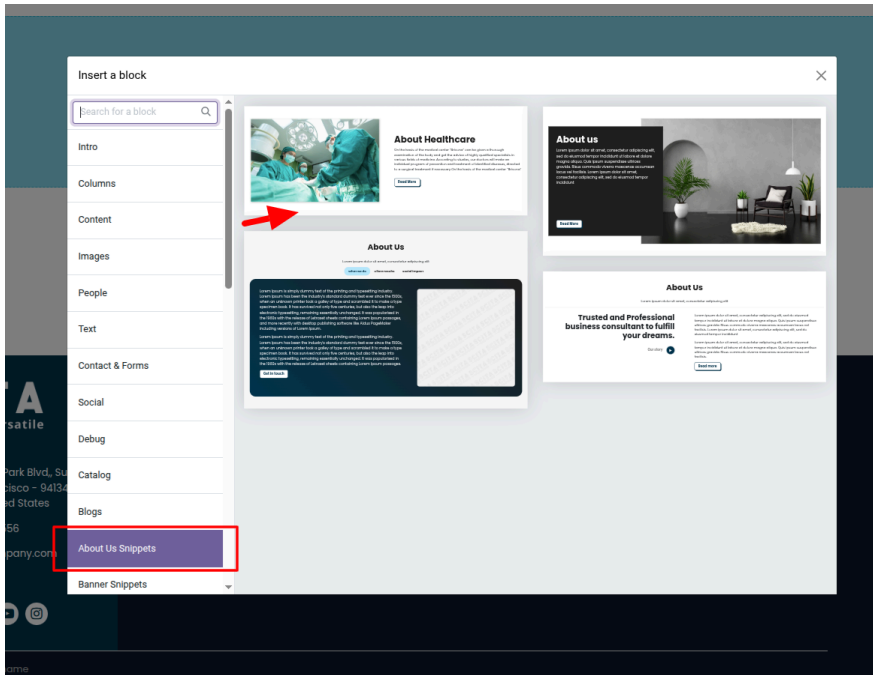

The screenshot displays the SCITA website editor. The top navigation bar includes the SCITA logo, a menu with 'Home', 'Other Demo', 'Collection', 'Popular', 'Shop', and 'Brands', a search icon, a phone icon with '+1 555-555-5556', a user profile icon labeled 'Administrator', and a 'Contact Us' button. The main content area shows a live preview of a webpage titled 'About Healthcare'. It features a large image of surgeons in an operating room, followed by the heading 'About Healthcare' and a paragraph of text. A 'Read More' button is positioned below the text. On the right side, a sidebar contains a 'Style' tab (highlighted with a red box) and various styling options for the selected snippet, including layout, background, content width, height, visibility, and column settings.

- Once all required snippets are placed and edited, click on the Save button to save the changes made to the web page.
- You can customize and edit the Snippet as per your requirement or website structure.

Theme Scita: List of Snippets

'About Us Snippet'

- For 'About Us', you will find **different options**.

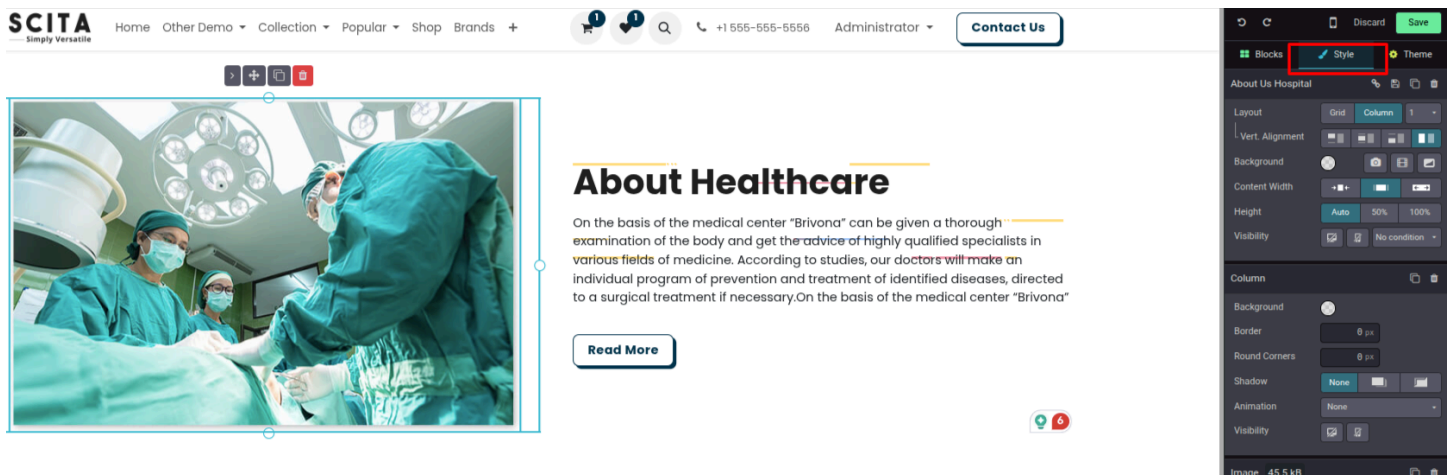

- Select snippet one from snippet list
- By selecting Snippet, you can customize the style elements like the Set No. of columns, Background, color, etc. and apply the text format from the 'Customize' tab.

- You can move, duplicate, and delete the snippet. You can also resize the snippet as per your needs.

- You can customize every block of the snippet. You can change the image by clicking on the image that you want to change or remove. Along with the image, you can also add Text, Document, Pictogram, and Video to the snippet.

- You can edit the text caption, color, button's color, and button effects by

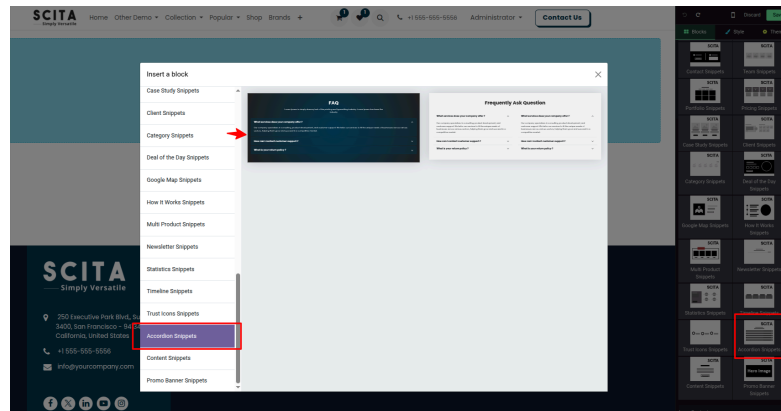

double-clicking on them.

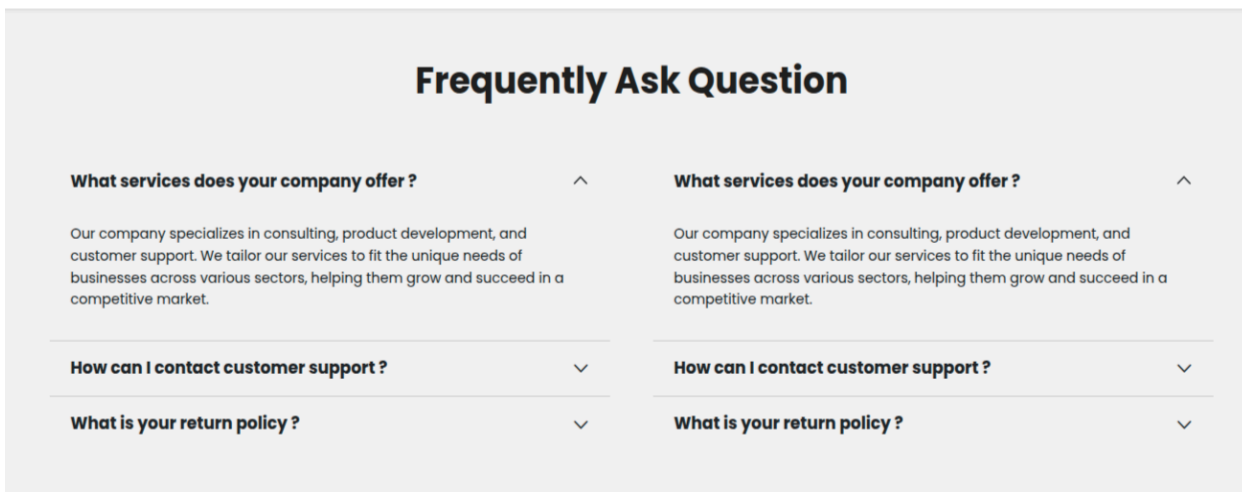

- When you select the 'Snippet', the snippet-related options will appear under the "Style" tab. Here you will find the name of the selected Snippet as a header.
- You can 'duplicate' the container or block of the snippet by clicking on the Duplicate (copy) icon and 'delete' the Snippet by clicking on the Delete icon.

Adding an 'Accordion' Snippet

- There are **two** variants for the 'Accordion' snippet.

- Select any of the 2 snippets on the page.

- After selecting the accordion snippet, you can easily customize the elements like text.

Adding 'Banner Type' Snippet

- There are different snippets for 'Banner Type' along with a video banner, select
- By selecting Snippet, you can customize the style elements: Set No. of columns, Background, and its
- Color, etc., and apply the text format from the 'Style' tab.

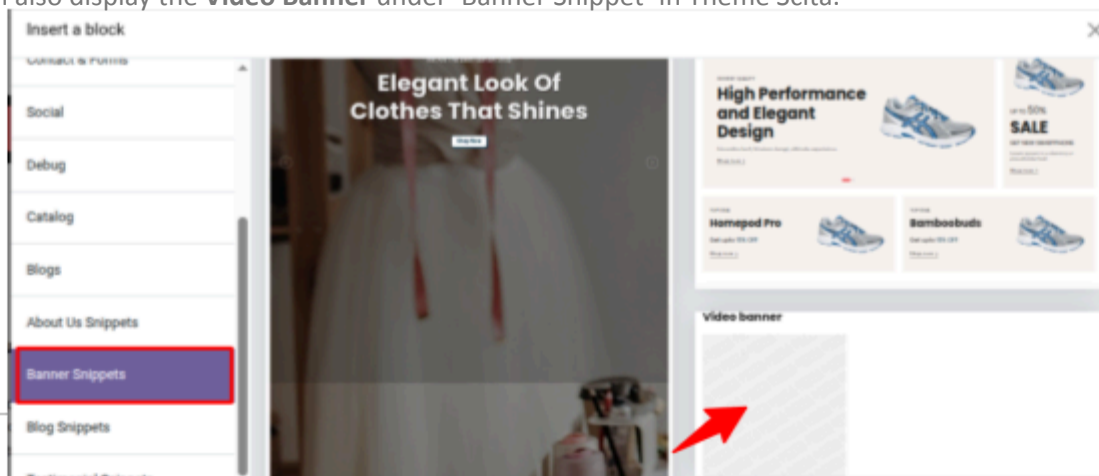

Banner Snippet

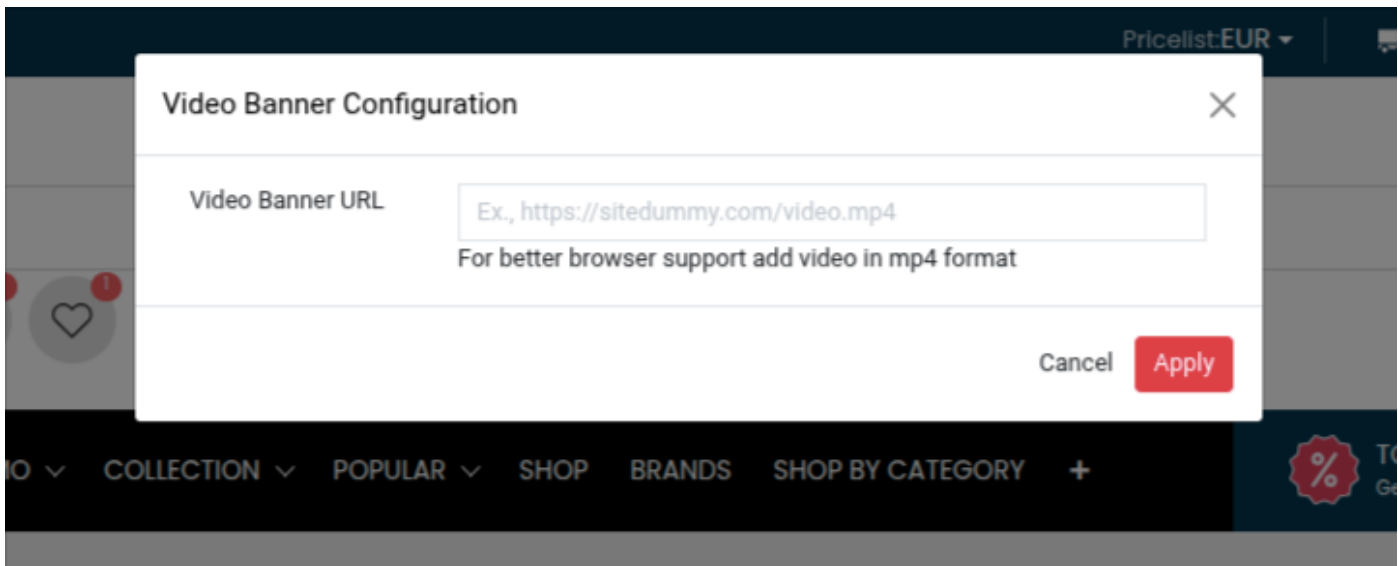

- You can apply the slide effects, and speed and add more slides with the description and images.
- You can also edit the text on the button, its background color, and the style of a button by double-clicking on it.

Video Banner Snippet

- You can also display the **Video Banner** under 'Banner Snippet' in Theme Scita.

- By selecting Dynamic Video Banner 1, a pop-up will appear named Video Banner Configuration.
- Insert the Video URL and Mp4 format will be preferable for better browser support.
- After inserting Video Banner URL, click on Apply button and Save the website changes.

Website View

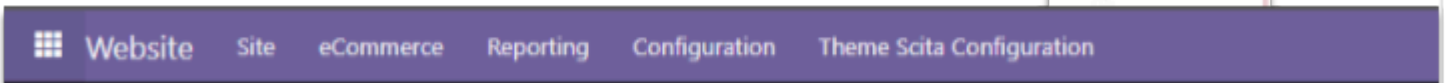

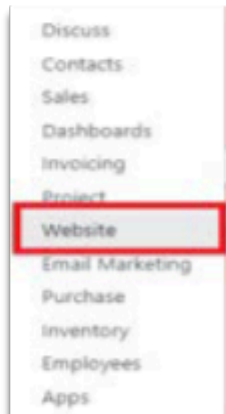

- Banner video will automatically be played when your customer browses your store.

'Blog' Snippet

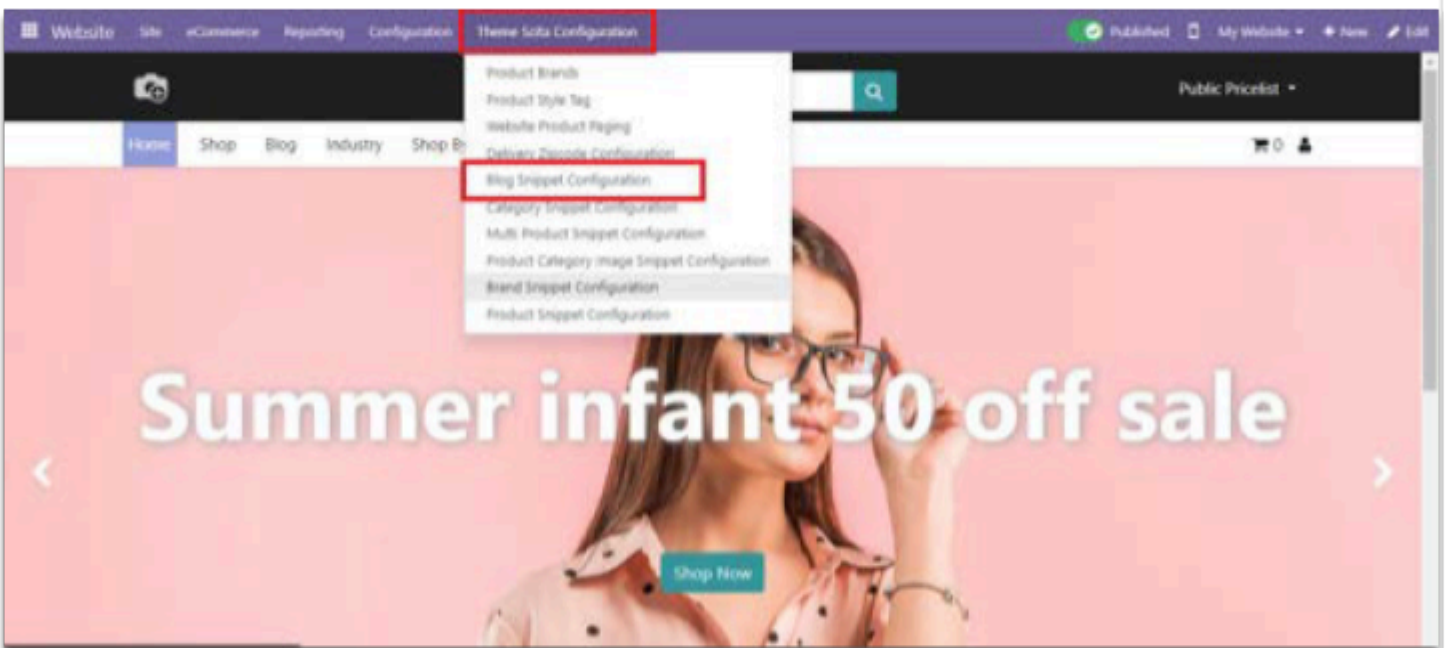

Back End Configuration

- To use this snippet, first you need to configure the same from the backend admin section.
- For that, go to WEBSITE  Website.
- By clicking on Website, you will find the dashboard with the header menu section.
- To configure the Blog snippet, first, you must insert a Blog post with its Category and Tags if required.

- To create a Blog post, click on **Blogs** from the header Menu and create a Blog with the required details.
Note: Once the blog is created, you should 'publish' it on the website.

- Now, go to **Theme Scita Configuration**  **Blog Slider Configuration** to configure the **Blog snippet**.

- From here, you can insert a 'Blog Slider', which you will need to select during Blog snippet selection.

- Now, create a new **Blog Slider** by inserting the required details and selecting the **Blog Post** from the 'Collections of Blog posts dropdown list.

- Now, you can use this snippet by switching to the website.
- Go to the Website -> Click on the Edit button available in the top right corner. By clicking on that, a snippet panel shows on the left side of the window.

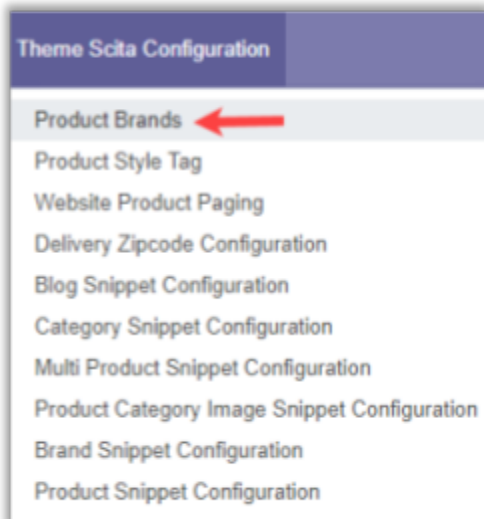

Website view (Front End view)

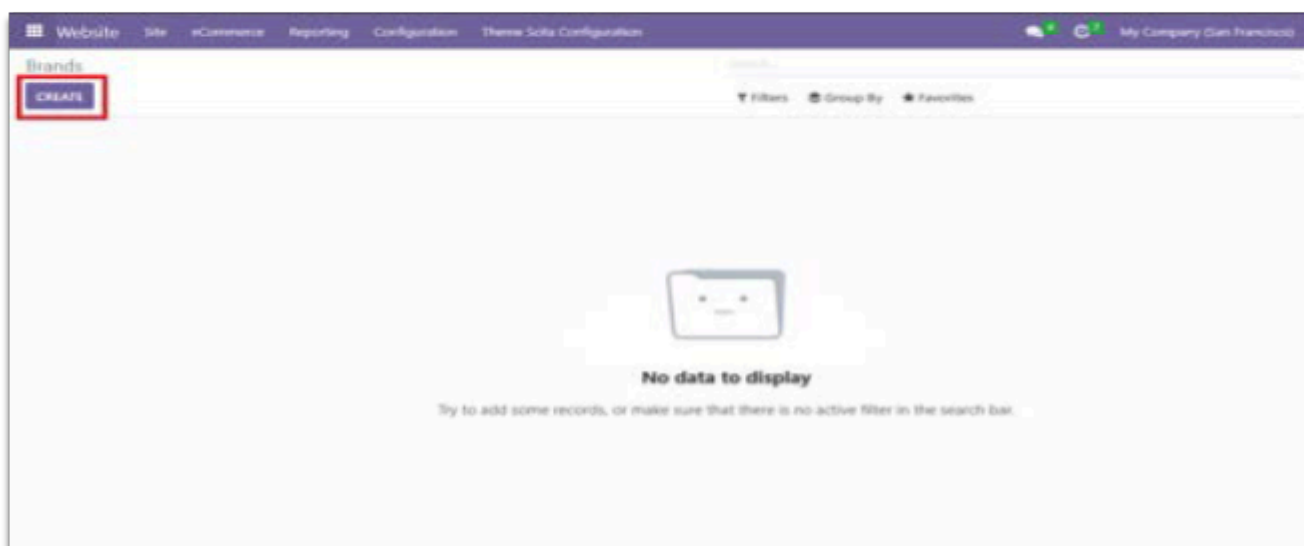

Configure 'Brands'

Backend Configuration

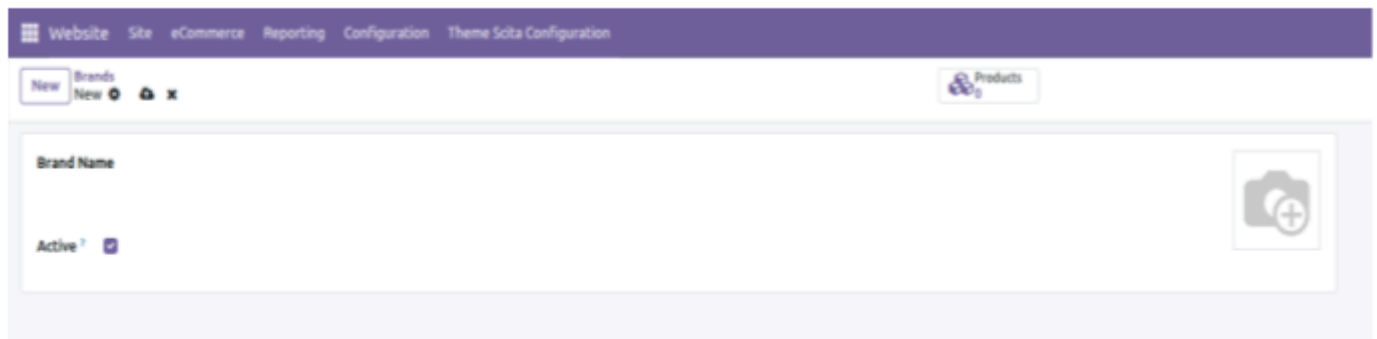

- For brands, first, you must configure 'Product Brands' in the backend.

- For that, go to **WEBSITE Menu** > **Website** > **ThemeScita Configurations** > **Product Brands**.
- By clicking on **Product Brands**, you will find the list of Product Brands.
- You can 'edit' the existing brand *or* 'create' a new brand.

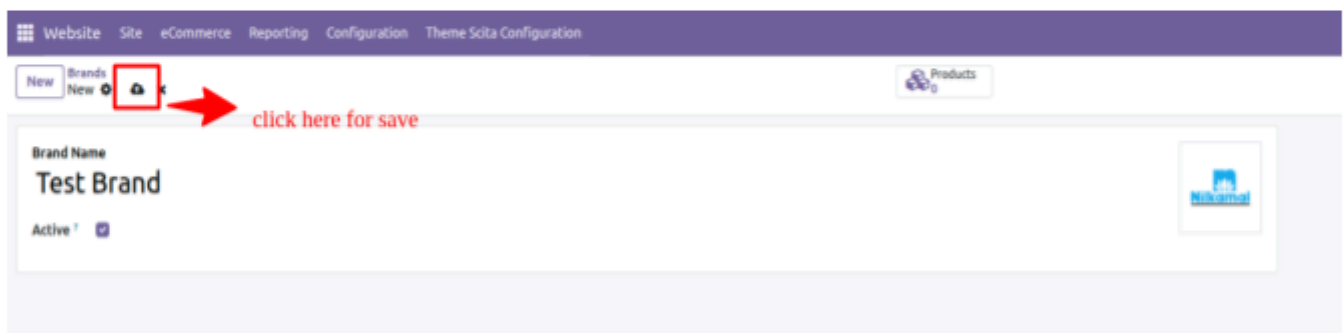

- After clicking on the create button you will be able to enter the name and insert the logo.

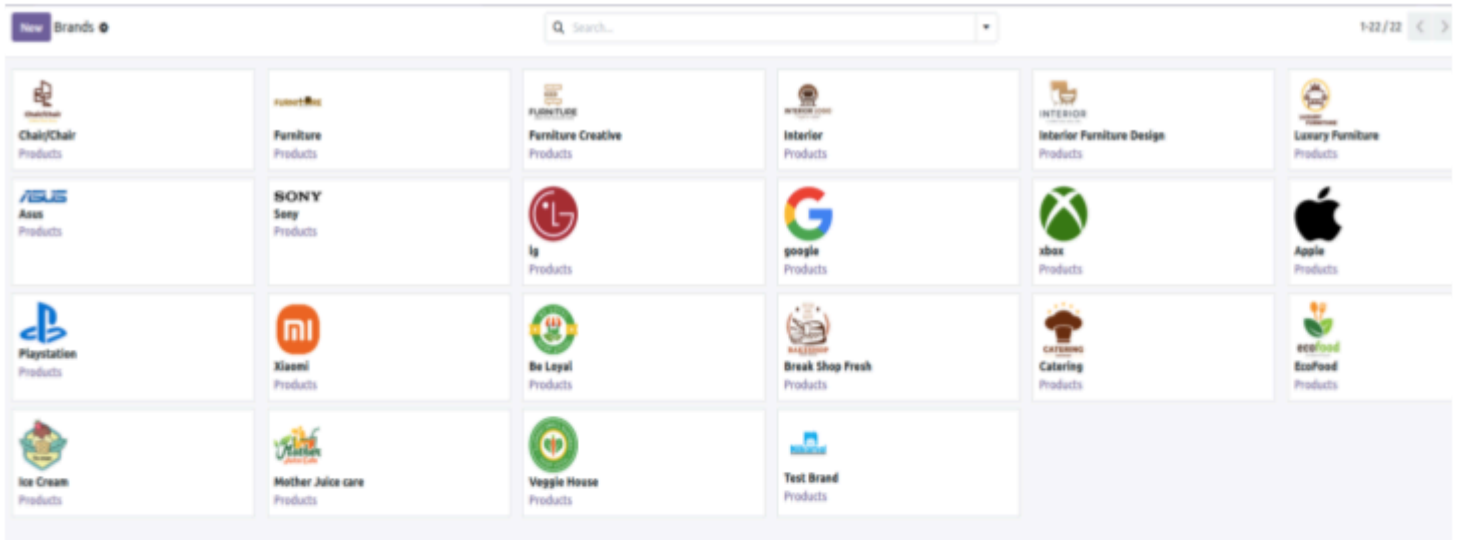

The screenshot shows a web application interface with a purple header bar containing navigation links: Website, Site, eCommerce, Reporting, Configuration, and Theme Solita Configuration. Below the header, there's a sub-header with a 'New' button, a 'Brands' tab, and a 'New' button with a lock icon and an 'x' icon. To the right is a 'Products' button. The main form area has a 'Brand Name' input field, an 'Active?' checkbox which is checked, and a logo upload area with a camera icon and a plus sign.

- Once you enter the details then you need to click on the save button.

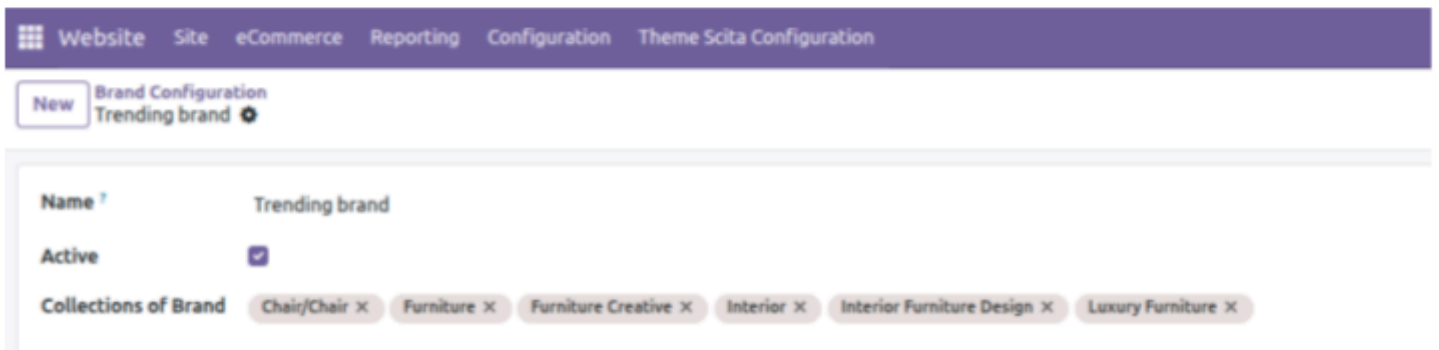

This screenshot shows the same 'New Brand' form as the previous one, but with the 'Brand Name' field filled with 'Test Brand'. The logo upload area now shows a placeholder image. A red box highlights the save button (a lock icon) in the sub-header, with a red arrow pointing to it and the text 'click here for save' in red.

- You will see the existing brands on the displays as seen in the screenshot below.

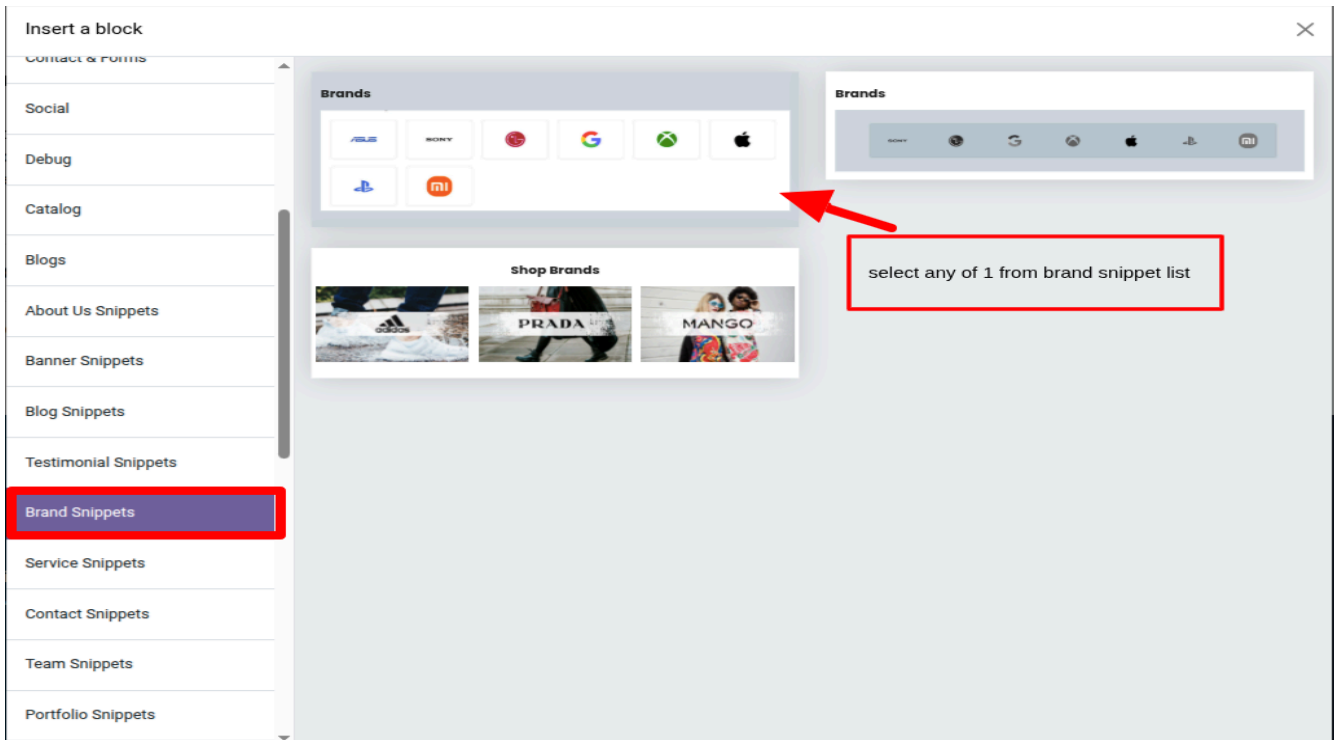

- You can manage the 'Collection of Brands' from the **Brand Snippet Configuration** under the **Theme Scita Configuration** menu.

- From the **Collections of Brand** option, you can select a brand, or you can also create a new one. After selecting, save it.

Website view (Front End view)

- Now, go to the Theme SCITA section and select the **Product Brands** snippet from the pop-up list.
- There are **different variants** for the 'Brand' snippet. Select any of the 3 snippets.

- As you select the variants, a pop-up will be shown named **Brand Configuration** to select a Brand from the list that you want to display on the website.

Front End View

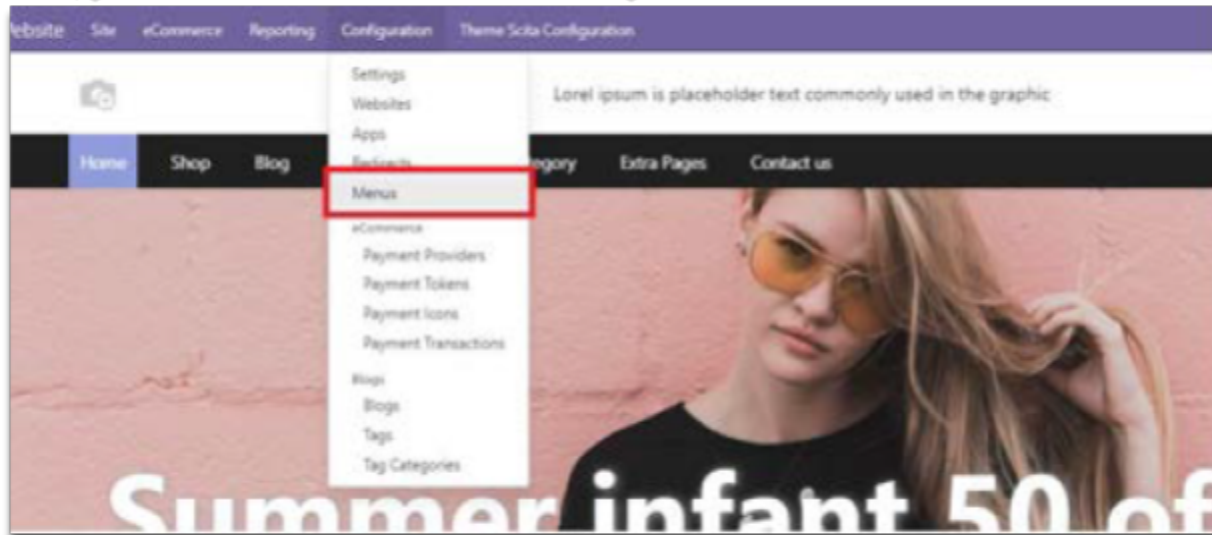

- The Social media icons can be seen on Header and Footer.

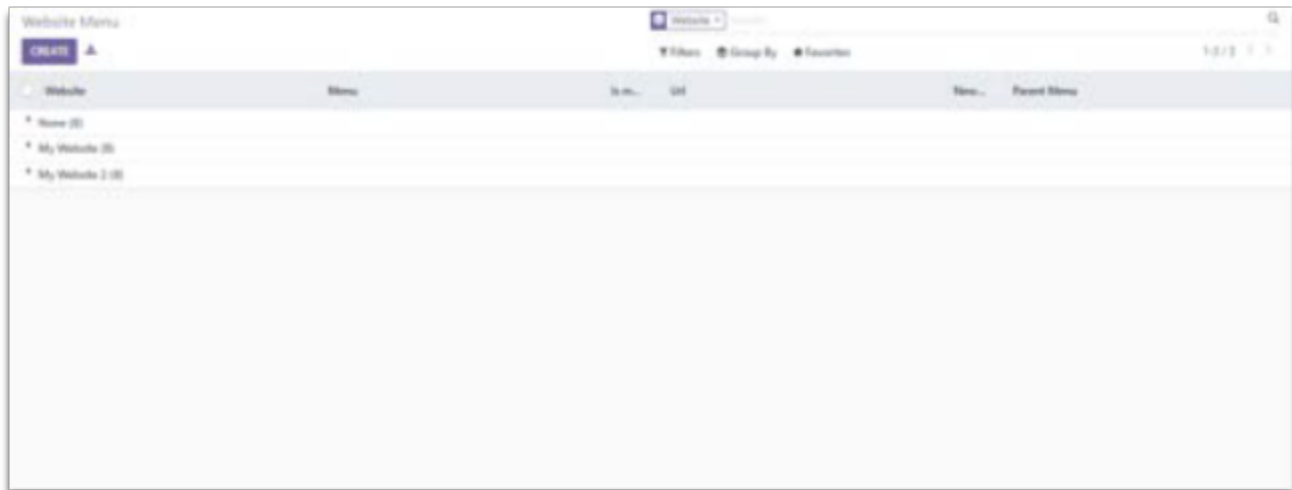

Configuring 'Mega Menu'

Backend Configuration

- Users can customize their mega menu as per their requirements. For that, the first user needs to enable the developer mode from the WEBSITE Menu [?](#) Settings [?](#) General Settings
- Navigate to the 'Developer Tools' section. Click on the Activate developer mode.
- After activating it, the Menu option will be displayed.
- Now, go to WEBSITE Menu [?](#) Website [?](#) Configuration [?](#) Menus.

- By clicking on it, you will get the "Menu" list. If you want to make Mega Menu from the list, you can do that by editing it or creating a new Menu.

- Check the “Scite Megamenu” checkbox to make a Mega Menu on the website.
- As per your website structure & requirement, select a Menu from the ‘Megamenu View Type’ drop-down option.

-
- You can choose different mega menu types as shown below:
 - **Category Mega Menu:** To display Mega Menu as per the categories.
 - **Category Image Mega Menu:** To display Mega Menu Category Images Menu.
 - **Product Mega Menu:** To display Mega Menu as per the products.
 - **Pages Mega Menu:** To display page categories in Mega Menu.
 - **Service Menu, Service Content Menu, and Service Banner Meg Menu.**

Configure General Settings of Mega Menu:

- The general settings of the mega menu contain below special features:
 - Select the no. of Columns you want to display in the Mega menu.
 - You can display the slider as per category sequence in Mega Menu using Category Slider. For that, 'tick' the Want to display category slider.
 - Insert the Slider Label (Name) which will be displayed on the header of the slider.
 - Enable the display Menu Footer and enter the text for the footer in the 'Footer Content' text area.

Configure Categories and Subcategories for Mega Menu

To create a Category:

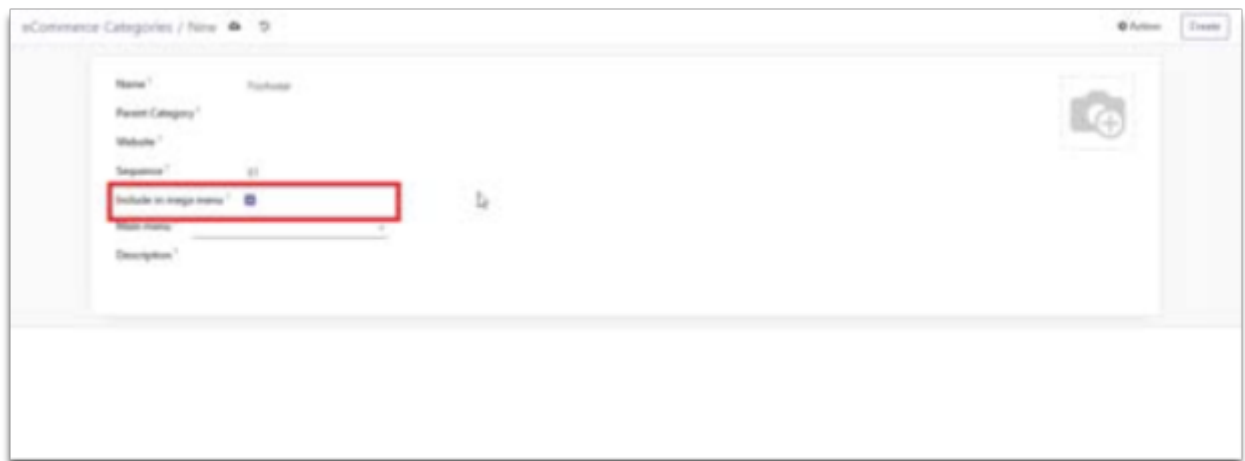

- Go to WEBSITE Menu > Website > eCommerce > eCommerce category. Now click on
- 'Create' button to create a product category.
- By entering the name of the category, you must check the Include in Mega Menu checkbox.
- You must select the Main Menu to display this category.
- To create a category, set the main menu as a menu based on your requirement.
- Give sequence numbers to decide the sequence.

The screenshot shows the 'eCommerce Categories / New' form. The 'Include in mega menu' checkbox is checked and highlighted with a red rectangle. Other fields visible include Name, Parent Category, Website, Sequence, Main menu, and Description.

To create Subcategory:

- Enter the name of the category and choose a Parent Category name in which you want to create a subcategory.
- You can also give a sequence number to decide the sequence.

This screenshot is identical to the one above, showing the 'eCommerce Categories / New' form with the 'Include in mega menu' checkbox checked and highlighted by a red rectangle.

Note: If you enter the category name and do not select the parent category then by default that category will also be included in the mega menu. In such a case, that category will be a parent category by default.

Mega Menu view (Frontend View)

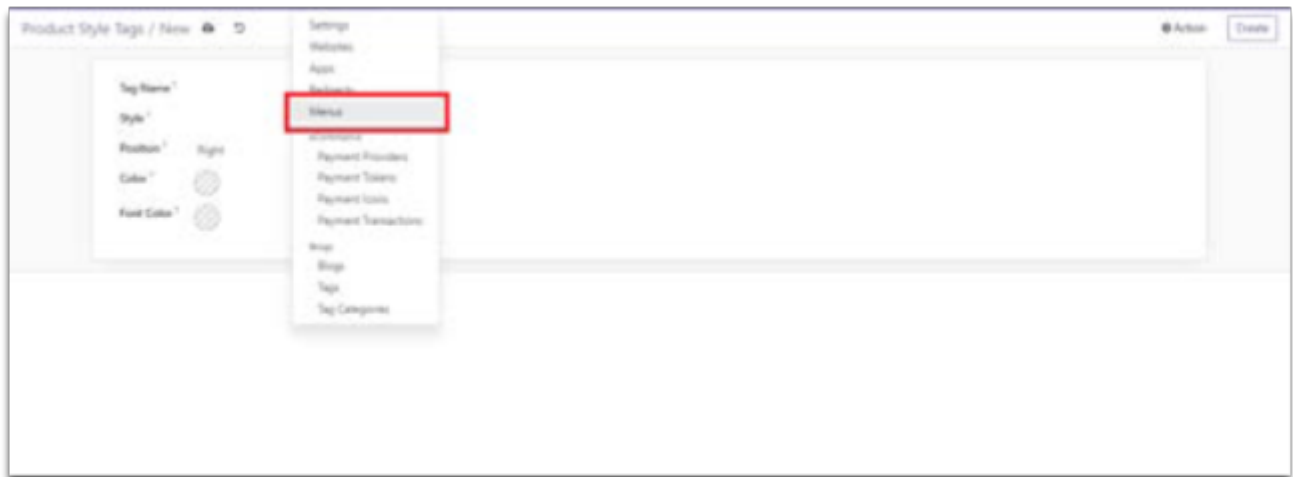

- The mega menu named “Festival Shopping” can be seen.
- The three columns of Parent Category as configured: Fashion, Furniture, and Jewelries
- If the Category Slider is enabled with related details that can be seen as per the selection of the position. Here in the category slider, the Parent Category slides will be displayed. (3 sliders)
- If the footer is enabled with the images and details that can be seen in the footer area.

Configuring 'Shop Page' Features

Configure 'Sales Ribbon'

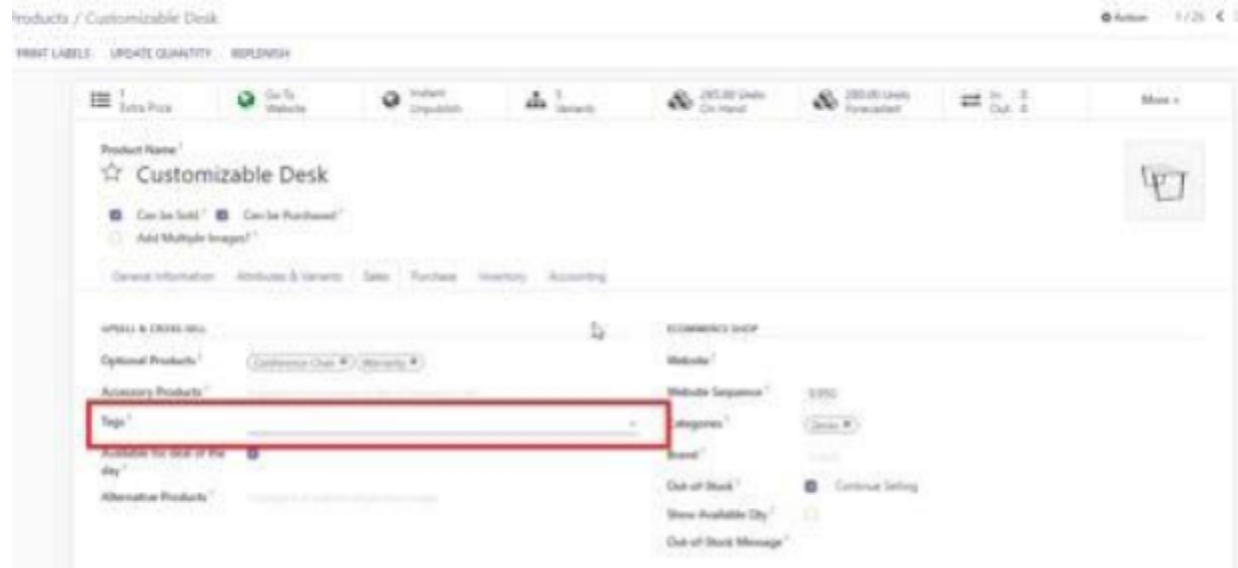

Backend Configuration

- For 'Sales Ribbon', you must configure it in the backend then only records can be displayed on the front.
- To configure go to WEBSITE → Website → Theme Scita Configuration → Product Style Tag.
- Then click on the Configuration → Menus

- Create Product Style Tags inserting 'Tag Name' and 'Color'.

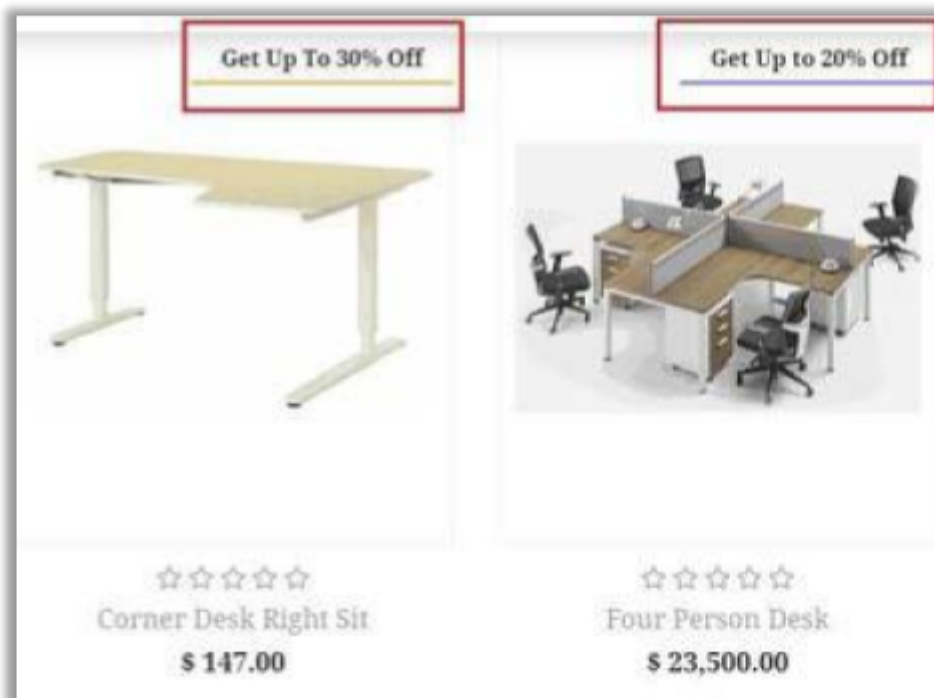

- After configuring the Product Style Tags (Sales Ribbon), go to Products Products.
- Select any product and click on the eCommerce tab where you need to select Tags for the product.

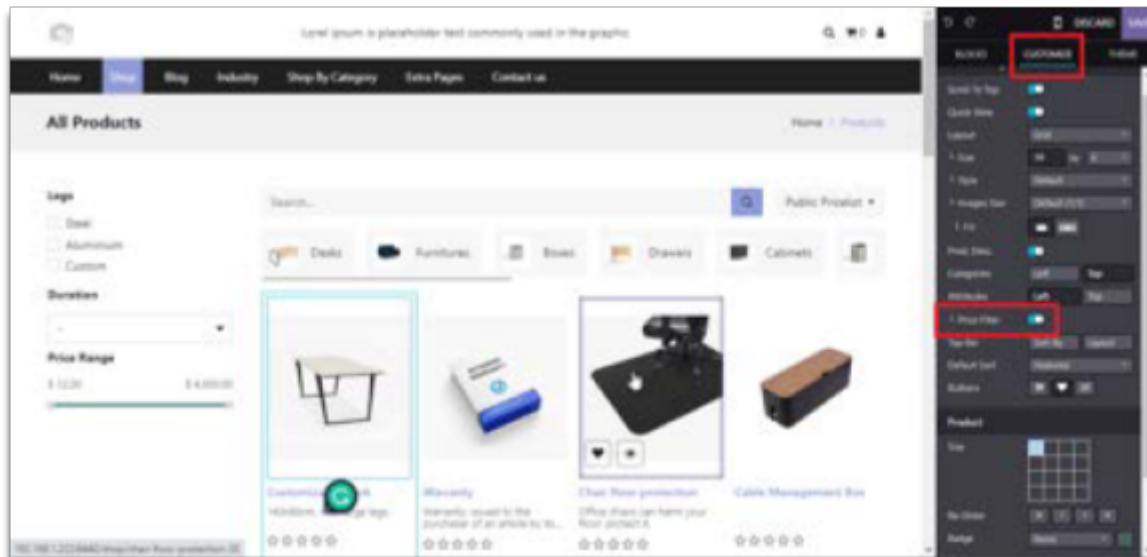

Website view (Front End view)

- After all the configurations, go to the website and check the products for which you have selected the Product Tags (Sales Ribbon). You will see the 'Tag' at the top right corner of the product.

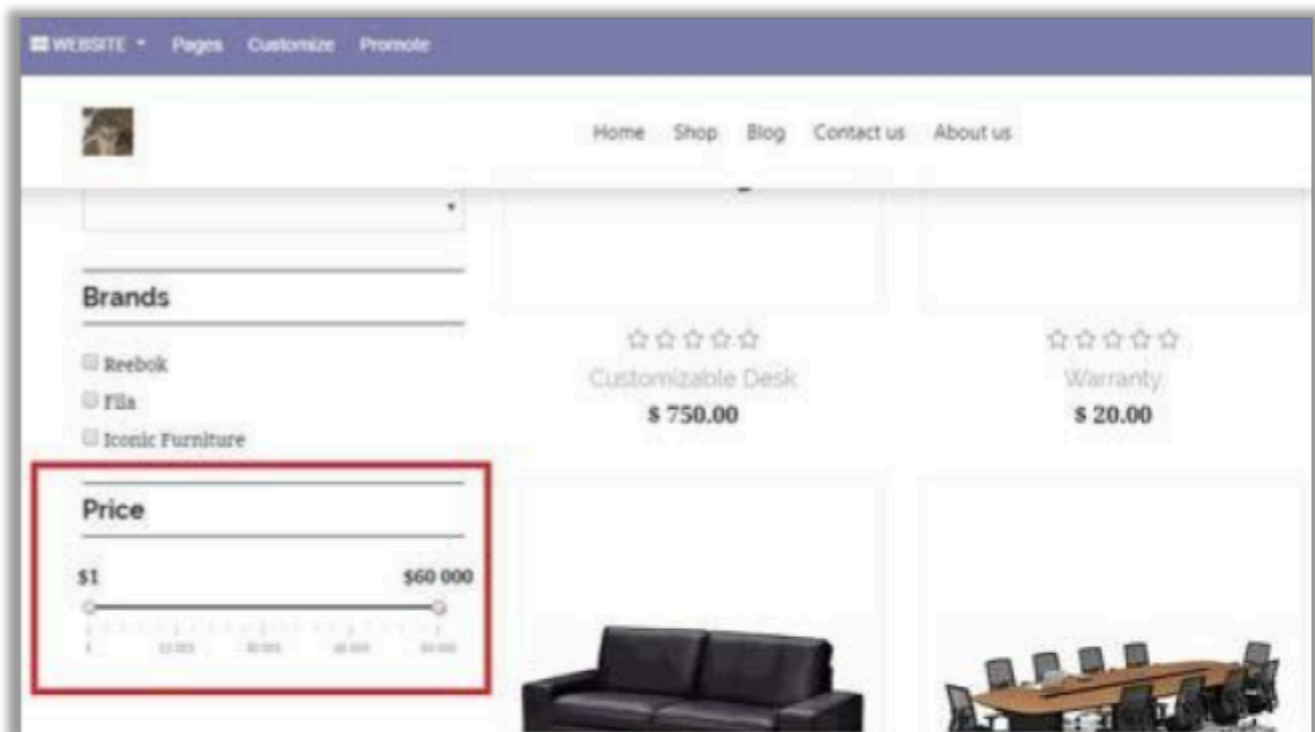

Configure the 'Price slider'

- To make 'Price Slider' visible on the website, go to the Shop page on the top left corner and you will find a Customize option.

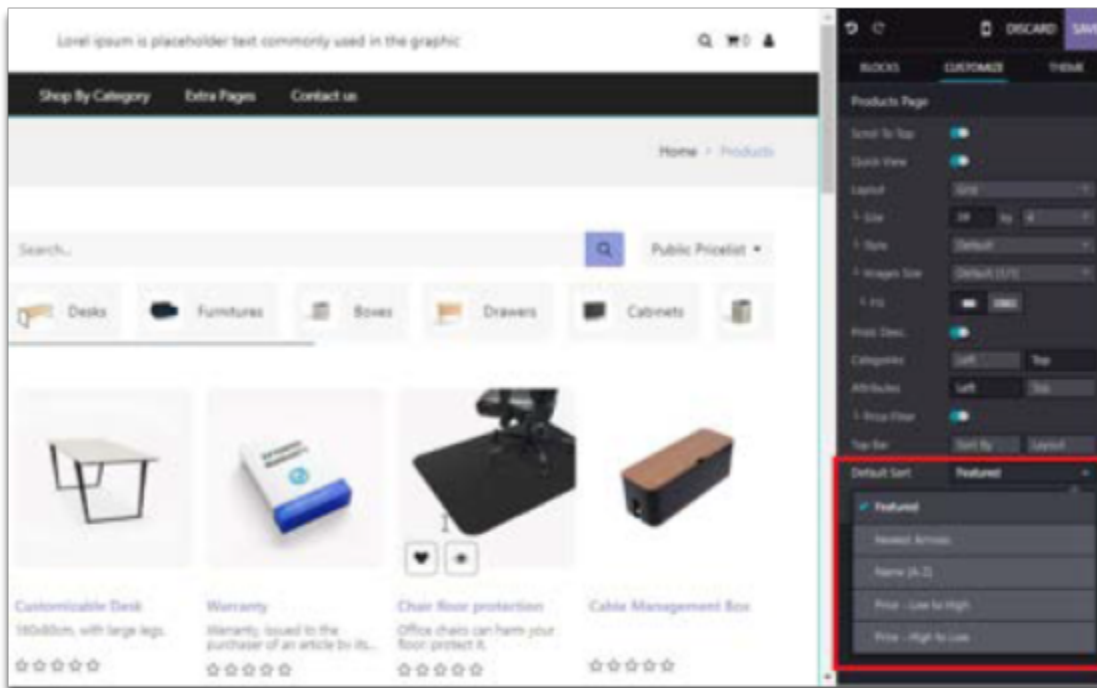

- Click on that and select the Product Price slider, then the price slider section will be visible on the Left side of the shop page.

Configure 'Sort by Feature'

- Sort by feature provides different sorting options like
 - Price: High to Low
 - Price: Low to High
 - Name- A to Z
 - Newest Arrivals
 - Featured

AS per category Visibility of Attributes:

- Here we can classify the e-commerce category by navigating website >Ecommerce >eCommerce Categories and we can add attributes and value as we require and based on that configuration we can see those effects on website front end.

Shop Product Hover effect:

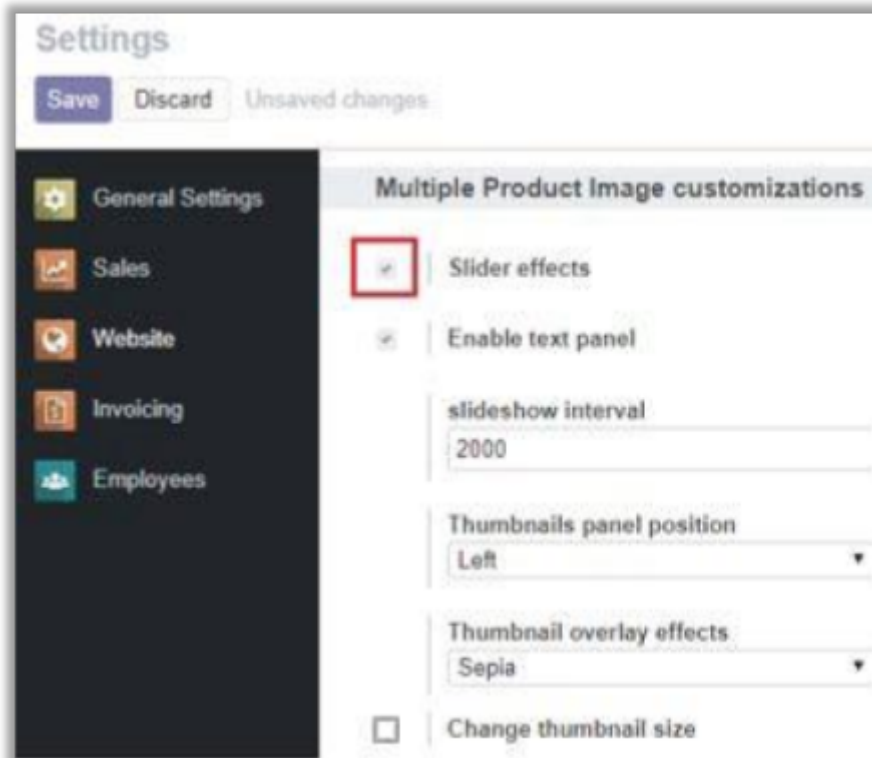

- For changing the hover effect of the product go to edit mode of the website and click on theme section and 4 different styles for hover effect and based on selection product hover effect will be changed.

Multiple Product Image customizations

- After configuring the multiple images for a product, you can customize the Multiple Product image.
- For that go to **Menu**  **Settings**  **Website**  scroll down to the **Multiple Product Image customization** options.
- Here you will find the two options: **Slider Effects** & **Thumbnail Size**.

- You can enable the Slider Effects to the multiple images of the product on the Shop page.
- By enabling the Slider Effects, you will get below options:

Enable Text Panel: You can display the product's text details which are inserted during product configurations.

Slideshow Interval: Insert the seconds to give the interval between two images while playing the slideshow.

Thumbnails Panel Position: Set the Thumbnail panel **Left**, **Right**, and **Bottom**.

Thumbnail overlay effects: Set the Thumbnail panel effects **B/W**, **Sepia**, and **Blur**.

You can set the Thumbnail size by inserting height & width.

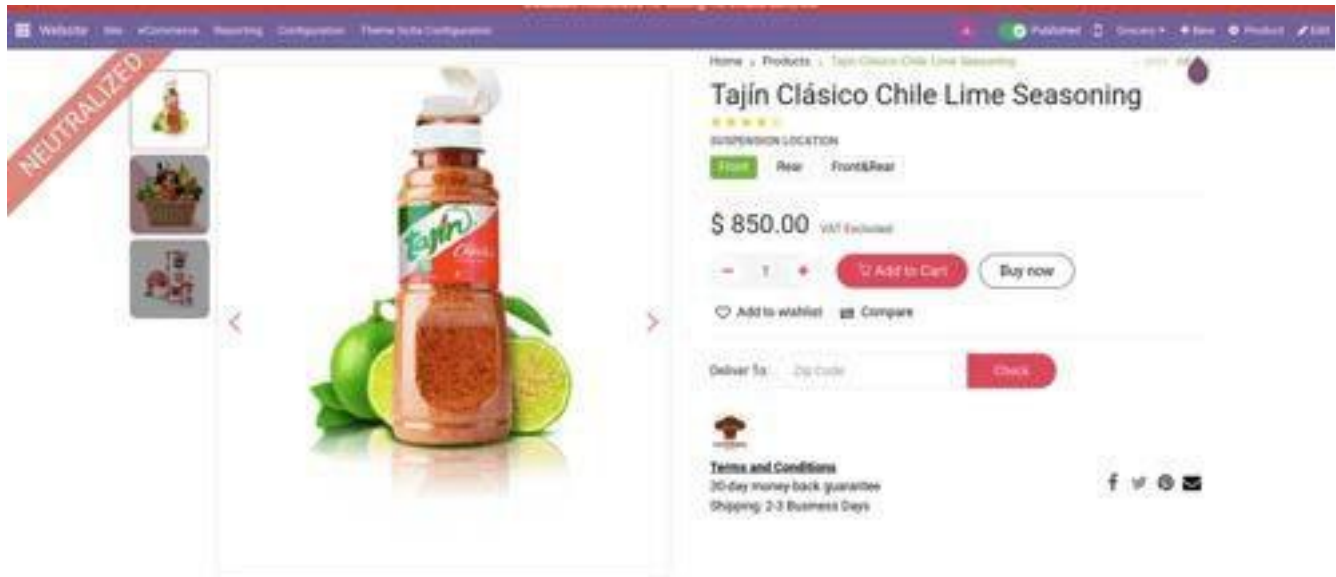

☒ **Change thumbnail size**

Thumb height

Thumb width

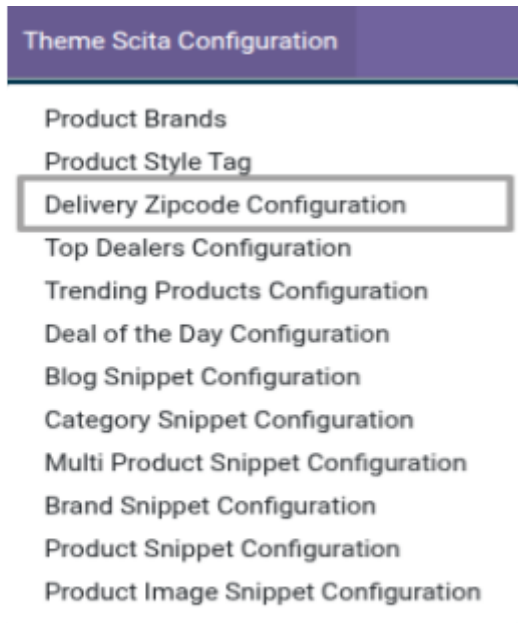

Website view (Front End View)

- Go to the 'Shop' page. Click on any Product. You will find a Multiple image slider if you have added multiple images to the image gallery.

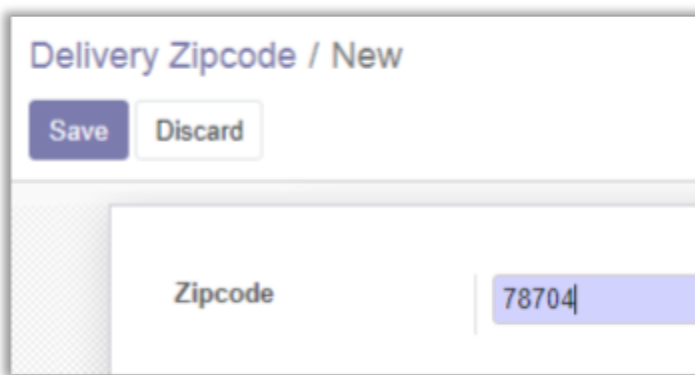

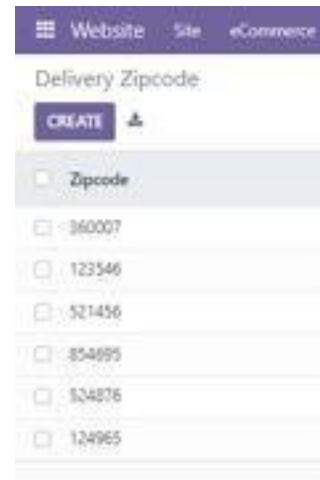

- As per Multiple Product image customization, you will get the Slider Effects option where you can play the slider, zoom in – out the image, and view the slider in Full page view.
- You can see the position of the Thumbnail panel and the size of the images in the thumbnail as per the backend customization.
- If you have enabled the 'Product Text' option, you will get the Product's text details as per inserted in the Product configuration.

Delivery Zip Code configuration

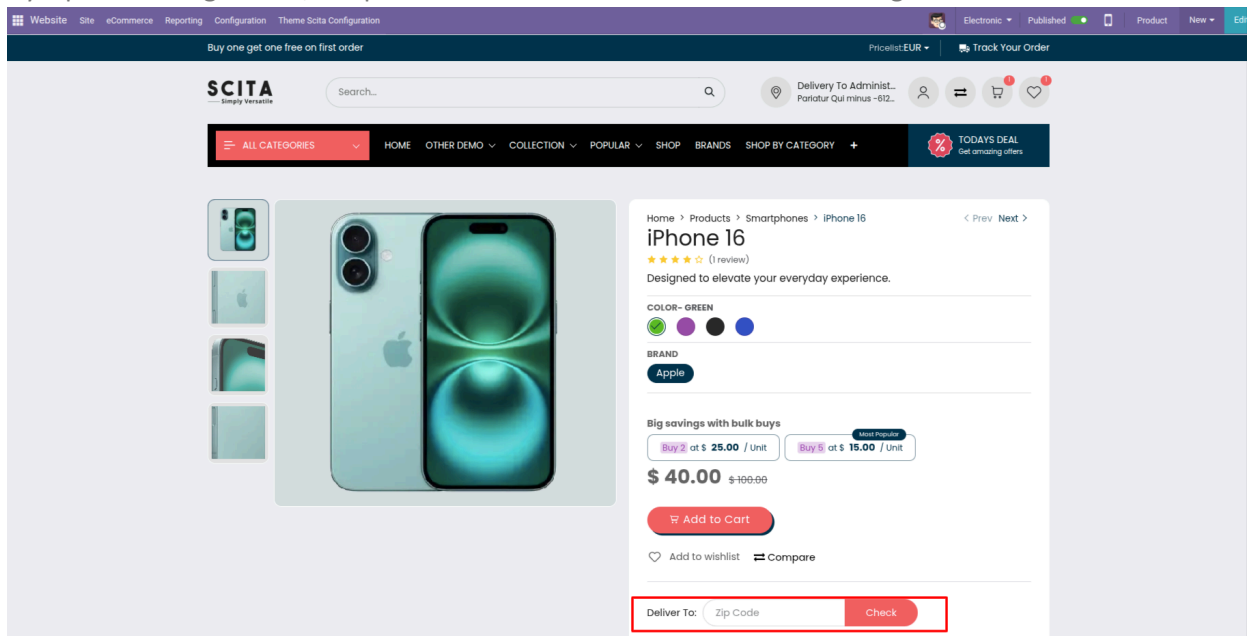

- You can configure the Zipcode. Based on that the customers can check whether the product will be delivered or not in their region.
- Go to Menu Website Theme Scita Configuration Delivery Zip code configuration.

- By clicking on **Delivery Zipcode Configuration**, the list of inserted zipcodes can be seen.
- By clicking on **Create** button, you can insert a Zipcode.

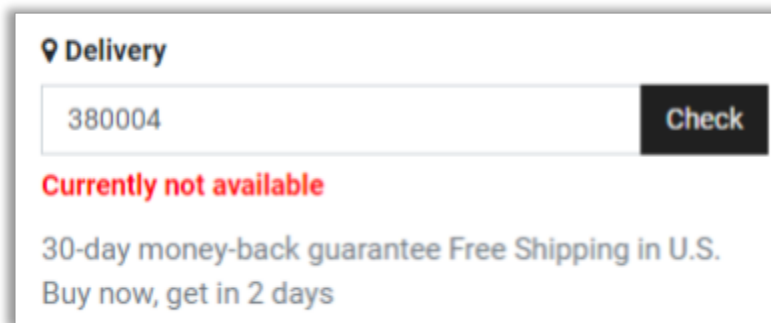

- Insert a Zipcode and save it.

- Now navigating to the Product detail page, if a customer inserts the Zipcode which is already inserted in the Delivery Zipcode configuration, the product will be available to deliver to that region.

- If the delivery Zipcode is not inserted in the list, the message will be displayed as Currently not available.
- You can configure the “Zipcode details” like text caption and messages from Menu  User & Companies  Companies.

Instant Publish/Unpublish Product

- When you add/edit the products, you need to publish them by opening “Website” and clicking on
- Publish button.
- Now, you can Publish/Unpublish any product instantly after adding or editing it.
- Adding/Editing any product, you will find the Instant Publish/Unpublish option.

The screenshot shows the product edit interface for 'Curved Wood Frame Chaise'. The top navigation bar includes 'Website', 'Site', 'eCommerce', 'Reporting', 'Configuration', and 'Theme Scita Configuration'. Below this, a toolbar contains 'Go to Website', 'Variants' (9), 'Documents' (0), 'Sold' (0.00), 'In: 0 Out: 0', and a highlighted 'Instant Unpublish' button. The main content area has tabs for 'General Information', 'Attributes & Variants', 'Sales', 'Prices', 'Inventory', and 'Similar Products'. The 'General Information' tab is active, showing product details like 'Product Type' (Goods), 'Sales Price' (\$1,400.00), 'Sales Taxes' (15%), 'Purchase Taxes' (15%), 'Compare to Price' (\$2,000.00), 'Base Unit Count' (Based on variants), and 'Category'. A right sidebar shows a 'Send message' button and a list of administrators.

- You can also Publish/Unpublish the products by multiple selections.
- In the Products list, you can find the Instant Publish/Unpublish from the Action drop-down.

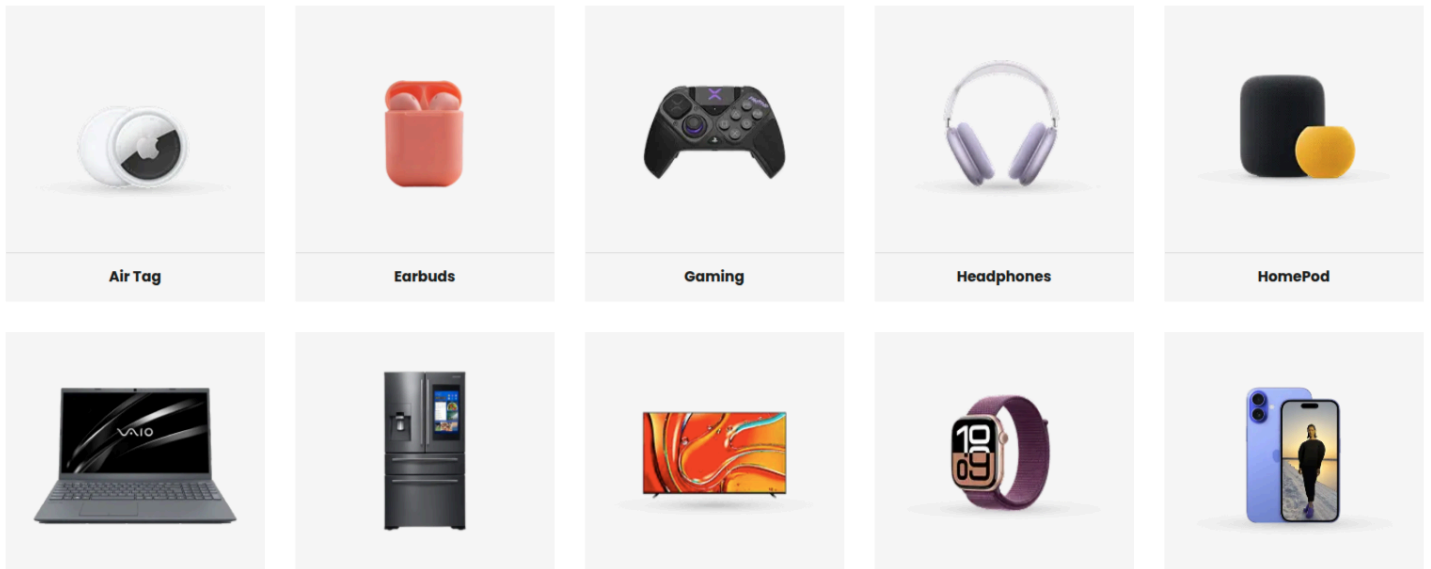

The screenshot shows the 'Products' list table. The top navigation bar is the same as the previous screenshot. Below it, a toolbar indicates '80 selected' and 'Select all 101'. The 'Actions' dropdown menu is open, showing options: 'Export', 'Duplicate', 'Archive', 'Unarchive', 'Delete', 'Print Labels', 'Pricelist Report', 'Instant Publish', and 'Instant UnPublish'. The 'Instant Publish' and 'Instant UnPublish' options are highlighted with a red box. The table below has columns: 'Product Name', 'Internal Re...', 'Categories', 'Sales Price', 'Cost', 'On Hand', and 'Forecasted'. The table contains several product rows, including 'Curved Wood Frame Chaise', 'Personalised Ceramic Mug', 'iPhone 16', 'Camera', 'Wooden Storage Table', 'L-Shaped Velvet Sofa', and 'OnePlus Nord CE4 Lite 5G'.
